IN LCU L-52

INS TARASA

Message from Chairman and Managing Director

On the occasion of the release of GRSE Varta 2018, I wish to convey my best wishes to all the employees of GRSE and their families.

GRSE has a long standing heritage of commitment to excellence and leadership through innovation both in its design efforts and production capabilities. These values have continued to serve us well through the last 59 years, since we were taken over by the Government of India and delivering the first indigenous warship to Indian Navy in 1961, just within one year of being taken over. The same values shall continue to serve us in the future.

The year 2017-18 was an eventful one which saw the delivery of the 3rd Anti-Submarine Warfare Corvette, INS Kiltan to Indian Navy with its unique feature of superstructure made of carbon composite material integrated with steel hull of a frontline warship. This made GRSE the first Shipyard in the country to have achieved such credible feat. Some of the milestones achieved during the delivery of Kiltan include completion of CST and FMT respectively in the shortest possible time in one sortie each. This helped us to make the ship ready for delivery to Indian Navy in a record time of 2 ½ months. In addition, the 2nd, 3rd & 4th Landing Craft Utility Ships were delivered with "NIL" Shipbuilders Liability and Weapons & Sensors Trials completed. The last of the series of four WJFACs, INS Tarasa too was delivered with the similar feats achieved on board LCUs.

In the last five decades, shipyard has delivered 97 warships for the maritime security of the nation, I am confident that the Team GRSE will achieve the coveted milestone of delivering 100th warship before the end of FY 2018-19.

The Company signed some strategic MoUs, which shall go a long way in terms of enhancing and boosting the business potential in future. Collaboration with M/s Elbit Systems, Israel for indigenous development of Unmanned Surface Vessel with Modular Multi Mission Capabilities is a step forward under the "Make in India" Initiative of the Govt. of India. GRSE also signed a MoU with Khulna Shipyard, Bangladesh to provide Know How for Design, Project Management & Construction of Ships. The series of MoUs signed with M/s CDCL Ltd, Bhutan & M/s Cooper Corporation, India shall help enhance the Engineering Business further.

GRSE was declared successful bidder in the competitive bidding for 04 Survey Vessels (Large) and 08 ASW(SWC) Ships involving other Public & Private Shipyards which has further boosted our confidence and spirits to achieve greater heights.

Some of the Prestigious awards that have come GRSE's way in the last one year include H'onble Raksha Mantri's Award for Best In-house Design Effort for CGS Barracuda, ICC PSE Excellence Award 2016, SCOPE Corporate Communication Excellence Award 2017, ET Bengal Corporate Awards 2018 & Governance Now 5th PSU Awards 2017, to name a few.

With the emerging strong Competitive Environment in Warship Building, shrinking profit margins and shorter delivery periods, the Shipyard needs to redefine its strategies in line with global standards to remain sustainable. It therefore becomes imperative for each employee of GRSE to work towards achieving highest Productivity Standards in all areas of our Operations to ensure reduction in Cost, Improved Quality & Timely Delivery of Platforms/ Products to Customers.

Jai Hind. Jai GRSE.

Rear Admiral V K Saxena , IN (Retd.)

Message from Director (Finance)

I am once again happy to note that 2018 issue of GRSE Varta is under Publication. The year gone by has been a demanding year and tasks at hand were no way easy but GRSE was not found wanting facing the challenges and overcoming most of them. We have started 2018 on a healthy note and by pooling in our resources and working as a cohesive team, we are poised to reach greater heights.

Some of the initiatives implemented in the last one year, towards improving our financial management include successful implementation of GST, Bill Tracking System, TDS, Registration with e-TReDS as per Gol directives, moving from conventional Imprest to Cashless transaction through Expense Management Card.

In the emerging competitive scenario where in orders on nomination have almost come to a close, with private players now in the fray for warship construction, it was a huge boost for team GRSE when we were declared the successful bidder in the competitive bidding for 04 survey vessels for Indian Navy. These vessels for the Indian Navy will be designed in-house by GRSE. The second icing on the cake came in when GRSE was declared successful yet again in the competitive bidding for the Anti-Submarine Warfare Shallow Water Crafts for the Indian Navy thus becoming eligible to construct 08 of these ships.

The last year has been eventful from the business associations developed, in terms of strategic MoUs signed. GRSE & M/s Elbit Systems, Israel signed an MoU for indigenous development of Unmanned Surface Vessel with modular multi mission capacity in MCM, ASW, EW & Maritime Security. MoU was signed with M/s Cooper Corporation, India for joint development and manufacturing of small and medium diesel engines for marine applications. M/s CDCL Ltd. of Bhutan and GRSE signed an MoU on performing commercial contract related to the supply of Components, Equipments and Services with respect to Portable Bridges.

Over the last one year, GRSE has been recognized for its efforts by various prestigious forums in many categories of functions being performed by the Company, including the Hon'ble Raksha Mantri's Award, ICC PSE Excellence Award, SCOPE Award, ET Bengal Award & Governance Now Award to name a few.

I wish to convey my sincere compliments to all the employees & their families for the achievements of the year gone by and urge one and all to keep their spirits high and ensure we move ahead this year too, to bring newer laurels to the company.

S S Dogra

Message from Director (Personnel)

I am indeed pleased that 2018 edition of "Varta", our house journal is being released. I take this opportunity to convey my greetings and best wishes to all employees of GRSE and their families.

The year 2017-18 has been an eventful year with the achievement of deliveries of various ships. GRSE has also won various Awards and Accolades in the field of Technology, Innovation, HR, CSR, Official Language which demonstrate the multifarious capability of our employees.

In the present competitive business scenario, private players are in the fray and GRSE is successfully competing on prestigious warship building projects of the Indian Navy and winning them too. Access to latest technology and creation of state of the art infrastructure are aspects that can be quickly mastered and developed. However, the biggest asset of any organization is always its human capital, who create the differentiator and in our case, the rich shipbuilding experience of our Officers, Supervisors and Operatives, makes us stand apart.

GRSE has always endeavoured to bring in HR initiatives so as to constantly nurture talents and build expertise, to retain our cutting edge, in the field of warship design, construction and other allied areas. Towards this direction, initiatives such as Leadership Development Programs, Succession Planning, Competency Mapping & Training Need Identification have been successfully initiated and implemented in the Company. Further, in order to bring in a culture of performance in the Company focused attention has been given for role clarity through Job Description & stronger Performance Management System. Apart from the above, towards initiatives on employee well being to encourage a "Healthy Mind" in a "Healthy Body" and building a more cohesive culture in GRSE we have taken initiatives towards organizing Yoga training & Sports events for employees and Painting & Cultural Programs for employees' family members.

In order to be in sync with Government's initiatives on national priorities viz; Skill India & Swatch Bharat, innovative approaches have been undertaken by GRSE as part of our CSR activities. Our CSR effort have been duly recognized & rewarded which goes on to prove that GRSE is not only an outstanding shipyard but also an outstanding corporate citizen with social concern.

I once again reiterate that in the fast changing business environment around us, we need to adopt & adapt to the changes quickly and change our ways of working in all walks of our work life which will help GRSE surge ahead.

I would like to compliment every employee of GRSE for the achievements of the year gone by and wish all success for the current year and the future. All the best.

A. K. Nanda

Message from Director (Shipbuilding)

I am happy to note that the next edition of GRSE Varta 2018 is being released.

The year gone by has been highly demanding but the team ensured commitments were met in terms of deliveries, launches and keels laid during the year. The commissioning of the 3rd ASW Corvette, INS Kiltan by the Honble Raksha Mantri on 16 Oct 17, at Vishakapatnam was a proud moment for GRSE. Kiltan has the unique feature of superstructure made of carbon composite material. It is for the first time in the country that such composite material has been integrated with steel hull of a ship and GRSE is the 1st shipyard in the country to have successfully achieved this feat. Use of this special material in superstructure has helped in reducing the

overall weight of the ship resulting in greater stability of the platform. Completion of CST of INS Kiltan in a single sea sortie, displayed the hard work put in by the GRSE Team.

LCUs, L-52 & L53 and WJFAC INS Tarasa, delivered in 2017-18, have accomplished the unique feat of having completed Weapons & Sensors Trials prior delivery and were also delivered with Zero Shipbuilders Liability. I would like to congratulate all personnel of GRSE on this stupendous achievement and take this initiative forward for all future ships.

Focus on productivity and its improvement is the key to taking our shipyard to greater heights in future and in view of the same, we have to ensure on-time delivery of our ships, planned for the year 18 -19. This is the time to introspect and learn our lessons from jobs executed last year and ensure implementation of corrective measures.

The Virtual Reality Lab shall be inaugurated soon and comes as a huge boost for the Central Design Team. The Design Team should continue its efforts in developing various concept designs for vessels that can cater to the future requirement of Indian Navy and Indian Coast Guard and vessels required for inland and coastal security of India and friendly neighbouring countries.

I wish all personnel of GRSE and their families good health, success and prosperity for the year ahead and also request one and all to focus on enhancement of productivity, quality and safety so that together we can overcome challenges of the future and deliver quality ships on time.

Cmde. Sanjeev Nayyar, IN (Retd.)

Message from Chief Vigilance Officer

It gives me immense pleasure to learn that the next edition of the in-house magazine “GRSE Varta” 2018 is being brought out chronicling major events and achievements. In a large organization, an in-house magazine is a wonderful opportunity to learn of our achievements and best practices. It helps in instilling a sense of pride among officers and employees. The year 2017-18 has been eventful in terms of our delivery completions for both warship and engineering products.

GRSE is increasingly being exposed to competition from the private and foreign shipyards and Govt. PSUs.

GRSE can be competitive only by keeping the cost of production low, reducing the time of production and maintaining a high standard of quality. In this respect, Vigilance Department has an important role to play. All of us must be vigilant that there is no wastage or idling of resources and leakage of fund. Vigilance is the responsibility of all the stakeholders of the company – including all its officers and employees and not just of the Vigilance Department. Vigilance Department, GRSE has formulated detailed guidelines on vigilance which has been circulated very recently in the form of Vigilance Manual 2nd Edition 2018 through Employee Portal.

I look forward to 2018-19 and I am sure that our capable officers and employees will make GRSE proud.

Subrat Das

Magical Milestone

INS Kiltan, 3rd Anti Submarine Warfare Corvette (Yard 3019)

The Third of the Kamorta Class Anti-Submarine Warfare (ASW) Corvette, INS Kiltan, indigenously built by Garden Reach Shipbuilders & Engineers Ltd, Kolkata was Commissioned by Hon'ble Raksha Mantri Smt. Nirmala Sitharaman, at Visakhapatnam on 16 Oct 17. Rear Admiral V.K.Saxena, IN (Retd), Chairman & Managing Director, GRSE and other Senior Officials of Indian Navy graced the Occasion

Commissioning

Delivery

GRSE got Talent

कवि सम्मेलन

कवि बृन्द यहाँ आते हैं
लेकर चिड़ियों की चहचाहट
विभिन्न विषयों पर तर्क वितर्क कर
दिखलाते हैं झुंझलाहट
कोई कवि हैं खोये अतीत में
किसी की रचनाओं में गरमाहट
खुलकर रखते बात सभी
नहीं किसी को है शरमाहट
कोई विषय हैं मीठे मीठे
और किसी में है कड़वाहट
बात एक विषय एक
कहने के हैं ढंग अनेक
बात बात पर हंसायें सबको
ऐसे भी हैं कवि कुछेक
वीर रस कोई रौद्र रस
कोई श्रृंगार धारा प्रवाह
कवि पढ़ते जब कविता
सब करते हैं वाह वाह वाह ।

कवि

शब्दों का तूफान लिए
और विचारों का समन्दर
करके ताना बाना
कवि लिखता निरन्तर
कवि का समाज में
बड़ा है रोल
उसकी कविता
सदैव अनमोल
कवि भी अगर
न सके सच बोल
कैसे खुलेगी
गलत रीतियों की पोल
कवियों को मिलना चाहिए
जनता का सम्मान
हो भरपूर आजादी
ना हो कोई अपमान

Shri K.S.Verma,
General Manager (IEP)

GENCHI GENBUTSU – GET YOUR BOOTS ON

Genchi Genbutsu is a Japanese Phrase meaning “Go and See for Yourself”. It is sometimes referred to as “Get your Boots On”, which has a similar Cadence and Meaning. Genchi Genbutsu is a Central Pillar of the Toyota Way, the Famous Management System adopted by the Japanese Car Company. Another Japanese word, Gemba, is Allied to the same Concept. Gemba means “Place”, the Place (as it were) where the Action happens. Genchi Genbutsu involves going to the Gemba to check on the Genbutsu (the Relevant Objects).

Masaaki Imai, a Japanese Management Writer who introduced the West to the Idea of Kaizen, wrote a book called “Gemba Kaizen”. This combined the Concept of Gradual Improvement (Kaizen) with an On-the-Spot Presence (Gemba)—being there in order to Spot any Opportunity for Improvement. Imai says there are Five Golden Rules of what he calls Gemba Management:

- When a Problem arises, go to the Gemba First—don't try to make a Diagnosis on the Phone.
- Check the Genbutsu—the Relevant Objects—because “Seeing is Believing”.
- Take Temporary Counter-Measures on the Spot to Resolve the Problem.
- Then find the Root Cause of the Problem.
- Lastly, Standardise Procedures to avoid a Recurrence.

Genchi Genbutsu represents a Fundamental Difference between the Western and Japanese Management Styles—whereas in the West, Knowledge is Gleaned and Digested in the Office or the Boardroom, in Japan it is Gleaned on the Factory Floor. When asked to resolve a Problem, Japanese Managers go to see the Place where it has Arisen. American Managers generally make their Diagnosis from a Distance. It is considered an Attitude as much as it is a Management Principle. The Managers are expected to be in touch with Operational Realities by being Physically Present at the most Relevant Place when there is a Problem or Decision to be made. The following are illustrative examples of Genchi Genbutsu.

- **Production Problems:** When there is a Production Line related Issue in the Shop Floor, Managers and Executives show up at the Location where the Problem has occurred. They take Decisions to get the Production Line moving and begin to Investigate Root Cause so as to find an Improvement that will prevent Future Problems.
- **Safety:** In addition to confirming Paperwork such as Checklists, Manager does a Visual Inspection of the Work Site on a regular basis.
- **Deployments:** A Ship is being Launched or proceeding for Trials, the Team's Managers all show up although they have nothing to do unless there is a Problem.
- **Training:** A Company trains potential Managers with a Job Rotation Scheme with the idea that a Manager should understand the job of everyone they are dealing with. Likewise, potential Executives in the Firm rotate Positions if they are to have a chance of being part of Higher Management.

In a nutshell, Genchi Genbutsu is more a Frame of Mind than a Plan of Action. When Information is passed around within Organization, it is inevitably Simplified and Generalised. In such a Scenario, the only Real Way to understand a Problem is to go and see it on the Ground. So let us get our Boots on and do some Genchi Genbutsu to bring about Positive Changes in our Work Place.

Shri Aravind Shankar
DGM(PP&C)

A POET & A TECHNICIAN

Poet Pandu Biswas is an Employee of Garden Reach Shipbuilders & Engineers Ltd., Kolkata. Presently, he is working as Structural Fitter in GRSE's RBD Unit. He had started writing poems from his childhood. His first book of poems was published in the year 2003. Till date, the total number of book of poems published is Six. At the Media Center of this year's Kolkata Book Fair, the Sixth Book of Poems, "Sabhyata Chinha" was published. Being born to a humble family and thereby reaching this height by his sole efforts is indeed a matter of great success. His parents have also not gone to school. Pandu Biswas is a successful Poet. Humanitarian Value System is his characteristic. He has an inherent merit of writing Poems.

Our Families Make Us Proud...

THE SLUM DWELLERS

A Part of the Human –
Lives in the Slum.
Staying in the Land is too...
Troublesome.
Yet they Acclimatize the Unbearable pain.
Did they Forget the Cordial Sense?
They make them Satisfied with very Little
So some Evil use them as Profit.
The Right to them is not given,
So they are called Backwards even.
The Tricky Politics is unknown to them.
So who will take the Shameless Blame??
The Hard Workers are found.
In the "Uncultured".
Are they called the Slum Dwellers???

BROKEN HEART

I am Staying now
Like the Lonely Moon.
I miss my Dears as they were
The Galaxy of Stars.
Why are they Unforgettable?
Where shall I conceal my Pain?
When the Pain reveals Tears
Then it increases my Fears.
I have a Heart which is broken
Finding it's Pleasure again and again.
Now I can realize the Moon's Pain.
Such a Lonely Life is totally Vain.

Miss Indrani Miitra
D/o Sadhana Das, Supervisor,
HR Department, Main Unit

WELFARE OF MY SOCIETY DEPENDS ON MY WELL BEING

A Right is what we can do and a Duty is what we should do. So it falls under our Duty to make our Society the best one. If we can take care of our Society then our Well-Being would be effective for the Growth of the Society.

We all should contribute at least something towards the Economy, Infrastructure and all other Aspects which need to be developed. For instance, if I am Educated, then I can spread Education among some People. My Society would be Effectively Developed only when there would be no Poverty and the Illegal Corruption, which hurts the Interest of some People. Mahatma Gandhi once said, "If we have to start, then we should start with Children". Educating the needy Children in our Society means imparting Education to the Future Generation.

We know that Rome was not built in a day. So it is high time to start contributing something to our Society. As per Gandhiji, we should bring the change in ourselves that we want to see in the Society. It is the Duty of every Citizen to be a part of that Change. The Response of every Citizen affects the Society either Directly or Indirectly. A Positive Response comes with Improvement, while a Negative Response brings Disaster. It is said that thousands of Bricks make a Building. Our Individual Contribution are those Small Bricks needed to develop a Healthy Society.

God has made us because we Human Beings are the ones who can bring about a Change. The Society is my Own and my Well-Being is the Main Factor that includes my Mental and Physical Health. If I am not Healthy, then my Society will also be Unhealthy as I am also a part of the Society. We should be Firm towards our Goal of bringing a Positive Change in our Society. We should be a part of that Change because all of us together only make a Complete Society.

"Yesterday is gone.
Tomorrow has not yet come.
We have only Today.
Let us Begin".
- Mother Teresa

PERFECT

*There are Speckles in the Whitest Clouds,
And Blemishes on the Pigeon, so White,
There are Spots on the Beautiful Moon,
There is Darkness below the Light.*

*There's no Fresh Morning without Sunset;
There's no Beginning without the End,
As there's no one without an Enemy;
There's no one without Friend.*

*You can't have the Joy of Success
Until you have the Pain of Failure.
You can't have the Joy of Smiling
Until you have the Stains of Tear.*

*I can't Run without a Fall.
It doesn't matter how far I go;
Things are never Alright,
I'm never Perfect I know.*

*All the Wishes are never fulfilled.
No one's Perfectly Happy and Fine.
There have to be some Ups and Downs;
No one's a complete Divine.*

*No one's Perfect, no one's the Best,
But, everyone's Better in some way.
All together make a Better World
A Better Place to Stay.*

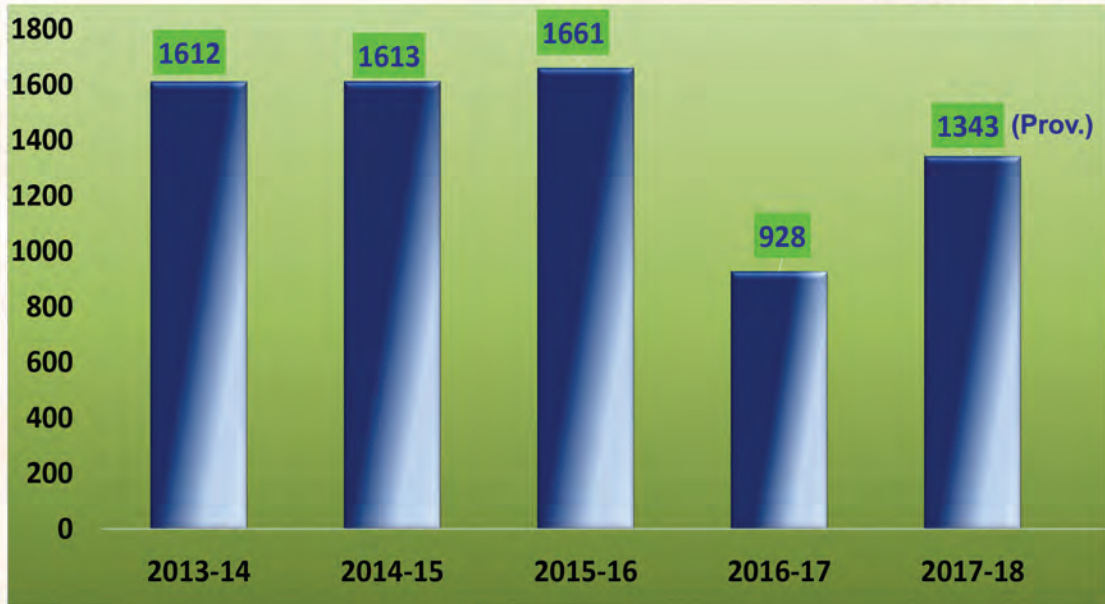

*No one's Perfectly Beautiful.
The Real Beauty lies within.
So, make the Heart, the Best one,
It's High Time, let's Begin.*
